

SOMERSET FIRE & RESCUE COMPANY No. 1
Standard Operating Guideline: F.A.S.T. Equipment Checklist
Effective August 1, 2004

Purpose & Scope

The crew of Rescue 56 must take the following equipment during F.A.S.T. team responses. Please refer to the SOG on FAST Team responses for full details on the operation itself. A line officer has the authority to modify this checklist as the incident type and/or building construction dictates.

F.A.S.T. Checklist

- **Switch SCBA bottles to the 1 hour bottles**
- **Wire stokes basket with accessory bag**
- **Officers bag**
- **Thermal Imaging Camera**
- **Hydra-Force tool – (only required for a commercial building or apartment type building)**
- **Search line bag**
- **Sledge hammer**
- **Irons**
- **SCOTT RIT pack**
- **6' Roofman's hook**
- **Portable radios**
- **Personal survivor lights attached to every members gear**
- **Light boxes (minimum 1 light box per every 2 team members)**
- **2 Power Saws – (building construction will dictate type and blade selection)**
- **First Aid Equipment, AED, and Oxygen kit – (only required if EMS is not on scene)**
- **Rope rescue bag**
- **4:1 hauling kit with hardware kit – (if possibility of low or high angle rescue)**
